REQUEST FOR  
CERTIFICATE OF CORRECTIONCERTIFICATE OF FACSIMILE TRANSMISSION

*I hereby certify that this correspondence, and the response attached hereto, are being faxed to Examiner Callahan of the United States Patent and Trademark Office, Washington, D.C. 20231 at 571-273-1740 on June 14, 2006.*

By

Sir:

Filed herewith is a Certificate of Correction to add claims 16-25 to U.S. Patent No. 6,781,548, which issued from the above-captioned patent application. U.S. Patent No. 6,781,548 should have issued with originally submitted claims 1-25. In a first office action mailed on January 07, 2004, claims 1-25 were rejected for nonstatutory double patenting. This rejection was overcome by a terminal disclaimer filed on April 7, 2005, putting claims 1-25 in condition for allowance. A Notice of Allowance was issued on May 17, 2005, mistakenly indicating that claims 1-15 were allowed, instead of properly indicating the allowance of claims 1-25. Thereafter, U.S. Patent No. 6,781,548 was issued with claim 1-15, instead of claims 1-25. The Applicant therefore requests entry of the attached Certificate of Correction to add omitted claims

16-25. Any fees due should be charged to Jones Day Deposit Account No. 501432, ref: 555255-012295.

Respectfully submitted,

JONES DAY

---

Joseph M. Sauer (Reg. No. 47,919)

PATENT NO. : 6,781,548

APPLICATION NO.: 10/014,940

ISSUE DATE : Aug. 24, 2004

INVENTOR(S) : Wen et al.

It is certified that an error appears or errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

These claims were omitted from the patent:

16. The antenna system of claim 15, wherein the monopole antenna and the dipole antenna comprise a top loaded member.
17. The antenna system of claim 16, wherein the top loaded member is a portion of the monopole antenna and the dipole antenna.
18. The antenna system of claim 15, wherein the monopole antenna and the dipole antenna comprise a transmitting antenna and a receiving antenna.
19. The antenna system of claim 15, wherein the first and second feeding ports are connected to a radio circuit.
20. The antenna system of claim 15, wherein the monopole antenna and the dipole antenna are mounted on a mounting surface, the mounting surface extending in three dimensions so as to orient the monopole antenna and the dipole antenna in the three dimensions.
21. The antenna system of claim 20, wherein the mounting surface is a dielectric substrate.
22. The antenna system of claim 15, wherein the antenna system is operable in a portable communication device.
23. The antenna system of claim 15, wherein the antenna system is operable in a wireless PDA.
24. The antenna system of claim 15, wherein the antenna system is operable in a wireless paging device.
25. The antenna system of claim 15, wherein the antenna system is operable in a wireless two-way paging device.
